Dear Christina,

the process, as communicated after the exam 😊, is that the approval by me is sufficient. I've checked your items, and I herewith approve - so ready for submission!

Cheers,

Hans.

Dear Gerta, dear Hans, dear Fergus,

I have done some minor revisions on my dissertation thesis:

- I replaced "behavior" with "intended behavior" as Fergus suggested
- I added missing words
- I added my recently published paper to the list of references (It was not listed as reference because it has not been published when I submitted...)
- I added Acknowledgements ;)
- ...

Please find the full list of my revisions attached. The revised manuscript is available under the link https://syncandshare.lrz.de/getlink/fiLgXic3mj2yswmKKGCSMR/dissertation_thesis_revised_2024_07_16.pdf

I assume that the three of you (and Thomas Neumann?) need to give your approvals. @Hans: is that right? How is the process?

Thank you very much for your help and patience.

Best wishes,

Christina
